

# The Skillion

## Mid Century Modern

This home was designed with the downsizer in mind. Not only does the home boast volume inside and out it's a home that can be enjoyed for many years to come. Designed on a sub-divided block this home took advantage of the existing pool and captured its beautiful views from the north facing rear. With an open plan design, the natural light will bring warmth and enhance the generous floor plan. The floor plan works well for guests wanting to stay over and alternatively it is generous by still providing privacy when required. Using different textures, colours and soft scapes this home will continue to age beautifully.
