

Aspen

Urban Prairie

The combining natural textures and materials, exposed structural timbers and timber lined eaves, the Aspen sits just easily in an urban landscape as in a rural setting. Expansive verandahs designed to make the most of panoramic country views create outdoor living areas that mirror the indoor areas, effectively doubling the living space when the bi-folds are opened up. The open plan, well proportioned upper level is designed for family living/entertaining and is complemented by the functional design of the lower level.
